WORK EXPERIENCE

Lazada
Principal Software Engineer

01/2021 - Present

Responsibility

- Appointed as new project's architect, I'm leading the team to build a new platform-as-a-service that unifying all services used by local operation teams. We use many low level Spring SPIs to achieve the flexibility and abstraction.

Lazada
Senior Software Engineer

09/2019 - 01/2021

Responsibility

- I'm in charge of building the platform to integrate with over 100+ TPL (third-party logistics) partners all over South East Asia. The whole idea is to provide an easy to plug-n-play module system with hot-reload for any TPL module.
- Key challenging: hot code reload, isolated execution environment for each module, GC tuning

Achievement: *Being recognized with "Special Promotion" for outstanding performance*

LINE Vietnam
Java Engineer

03/2017 - 03/2019

Responsibility

- At LINE I joined and learned about many big projects that serve millions users of LINE. My main responsibilities back then is to design Database, review source code, develop core modules for project and work with partner to fetch data from external API.

Nissho Electronics Vietnam
**Team Leader**

01/2016 - 03/2017

Responsibility

- Review source code and design document. Make code sample, provide guidance on Java 8, provide solution

EDUCATION

Software Engineering
FPT University

2011 - 2015   *GPA 8.78 / 10*

SKILLS

OpenCV MongoDB Neo4j MySQL Spring
AOP Go Java Redis jQuery
Problem solving

CERTIFICATIONS AND AWARDS

- TOEIC 870

- Excellent employee Award

- 1st rank graduate in Software Engineering - GPA: 8.78 (01/2016)

- Excellent student Award (2013)

- Nguyen Van Dao Full Scholarship (2011)

- Incentive prize in Vietnam Mathematical Olympic (2011)

- Top 1% #java on Stackoverflow
